Typ NXN

DisplaySwitch – Forget additional displays

Your DisplaySwitch enables direct integration of HDMI- or DisplayPort-capable devices into your head unit—without dependence on proprietary solutions like Android Auto or Apple CarPlay. You benefit from full multitouch functionality and automotive-grade quality.

B-358FD07 (VW)
B-358FD02 (Ford)

Your Application – Our Solution

For the diverse challenges in the emergency service and special vehicle sector, we offer specialized solutions. Our **Signalbox ABH B-3450310** enables the output of analog signals, for example for door contacts, which are particularly frequently required in this field of application.

B-3450310

The **AutoAssist-Off B-3470090** allows driver assistance systems to be selectively and temporarily deactivated by controlling them with an analog signal. This is particularly useful, for example, when entering an emergency lane with blue lights activated.
